## SUMMARY

Full-stack software engineer with 2.5+ years building production systems end-to-end: ERPs, e-commerce, fiscal/invoicing platforms (CFDI 4.0) and mobile apps. At PibyteLabs I maintain the internal TypeScript package ecosystem behind every company product and authored listkit and uploaderkit, published as open source on npm — powering client products in production. Focused on maintainable architecture, offline-first design and developer experience.

## EXPERIENCE

### Lead Full-Stack Developer — PibyteLabs — Remote, Mexico — May 2025 – Present

- Designed and maintain the internal @pibytelabs TypeScript package ecosystem (ui, utils) that powers every company product; lead author of **listkit** (declarative list views for React; byte-identical CSV export parity verified across memory, MongoDB and PostgreSQL test suites) and **uploaderkit** (full-stack file uploads with a shared client/server contract, AES-256-GCM encryption, GCS/S3 providers).
- Published listkit and uploaderkit as open source on npm so other teams can use them too; automated releases with release-please and strict quality gates (ESLint, Knip, size-limit, publint, attw).
- Delivered production systems for real clients with maintainable, well-documented architectures: a 13-app offline-first ERP monorepo, a multi-tenant CFDI 4.0 invoicing platform, and an autism-care nonprofit's back office with encrypted health data.
- Stack: Next.js, React, TypeScript, Node.js, Express, PostgreSQL, MongoDB, Tailwind CSS.

### Full-Stack Developer — CorpFiscal — Chihuahua, Mexico — May 2025 – Present

- Building a corporate fiscal platform of 13 internal apps (legal, customers, invoicing, HR, reception) on Express microservices and MongoDB.
- Developed fiscal features across the platform: CFDI invoicing via Facturapi, Stripe payments and WhatsApp notifications.
- Implemented real-time collaboration features with WebSockets, Yjs and Excalidraw.

### Full-Stack Developer — SID Enterprise — Chihuahua, Mexico — Dec 2024 – Apr 2025

- Developed enterprise Java applications on a custom Struts-based framework; integrated IoT systems via REST/HTTP APIs; built cross-platform modules for real-time inventory tracking with MySQL.

### IT Intern — Honeywell Intelligrated — Chihuahua, Mexico — May 2024 – May 2025

- Engineered 20+ automation solutions with VBA/VB.NET, reducing manual processes by 40%; built real-time metric dashboards via Oracle ERP integration; developed ASP.NET MVC web apps with SQL Server.

## OPEN SOURCE

- listkit** — Declarative list views for React: search, advanced filters, pagination, CSV export, SSR, 10 tree-shakeable subpath exports, i18n EN/ES. Published on npm, MIT. [npmjs.com/package/listkit](https://npmjs.com/package/listkit)
- uploaderkit** — Full-stack file upload layer: headless React hook, magic-number validation, image compression, retry/abort, GCS/S3 providers, AES-256-GCM encryption. Published on npm, MIT. [npmjs.com/package/uploaderkit](https://npmjs.com/package/uploaderkit)

## SELECTED PROJECTS

- Café Combate** — Offline-first ERP monorepo with 13 apps (warehouse, sales, production, purchasing, CFDI 4.0 invoicing, payments). React, Vite, Dexie, Express, PostgreSQL, Turborepo.
- Facturalandia** — Multi-tenant electronic invoicing platform (CFDI 4.0): per-organization encrypted keys, signed webhooks, in-house auth. Express, MongoDB, Redis, Google Cloud Storage, Stripe.
- Agates From Mexico** — E-commerce with Stripe, PayPal, ShipStation, RBAC, Redis and Cloudinary. Next.js, PostgreSQL.
- Metri** — Open-source fitness platform: web toolkit (16 calculators, bilingual, PWA) + offline-first mobile app. Next.js, Expo, SQLite/Drizzle.

## SKILLS

**Languages:** TypeScript, JavaScript, Java, SQL, VB.NET/VBA

**Frontend:** React, Next.js, React Native (Expo), Tailwind CSS

**Backend:** Node.js, Express, ASP.NET MVC, REST APIs, WebSockets

**Data:** PostgreSQL, MongoDB, MySQL, SQL Server, Redis, SQLite, Drizzle ORM

**Tools & Cloud:** Git, CI/CD, Vitest, Puppeteer, Vercel, Heroku, AWS S3, Google Cloud, Stripe, Facturapi (CFDI 4.0)

## EDUCATION

**B.Eng. in Software Development and Management** — Universidad Tecnológica de Chihuahua — 2024 – 2026

**Technical University Degree in IT, Multiplatform Software Development** — Universidad Tecnológica de Chihuahua — 2022 – 2024

## LANGUAGES

Spanish (native) · English (B2)
