SUMMARY

Full-stack software engineer with 3+ years building production systems end-to-end: ERPs, e-commerce, e-invoicing platforms and mobile apps. At PibyteLabs I maintain the internal TypeScript package ecosystem and authored listkit and uploaderkit, open source on npm. Focused on maintainable architecture, offline-first design and developer experience.

EXPERIENCE

Full-Stack Developer — PibyteLabs — Remote, Mexico — May 2025 – Present

- Designed and maintain the internal @pibytelabs TypeScript package ecosystem (ui, utils) powering every company product; author of **listkit** (declarative list views for React) and **uploaderkit** (full-stack file uploads with AES-256-GCM encryption, GCS/S3 providers).
- Published both packages as open source on npm, with automated releases and strict quality gates.
- Shipped production systems for real clients: a 13-app offline-first ERP monorepo, a multi-tenant e-invoicing platform, and a nonprofit's back office with encrypted health data.

Full-Stack Developer — CorpFiscal — Chihuahua, Mexico — May 2025 – Present

- Building a corporate fiscal platform of 13 internal apps (legal, customers, invoicing, HR) on Express microservices and MongoDB.
- Developed fiscal features: e-invoicing, Stripe payments and WhatsApp notifications.
- Implemented real-time collaboration with WebSockets, Yjs and Excalidraw.

Full-Stack Developer — SID Enterprise — Chihuahua, Mexico — Dec 2024 – Apr 2025

- Developed enterprise Java applications on a custom Struts-based framework; integrated IoT systems via REST/HTTP APIs; built modules for real-time inventory tracking with MySQL.

IT Intern — Honeywell Intelligrated — Chihuahua, Mexico — May 2024 – May 2025

- Engineered 20+ automation solutions with VBA/VB.NET, reducing manual processes by 40%; built real-time metric dashboards via Oracle ERP integration; developed ASP.NET MVC web apps with SQL Server.

OPEN SOURCE

- listkit** — Declarative list views for React: search, filters, pagination, CSV export, SSR, i18n. Published on npm, MIT. npmjs.com/package/listkit
- uploaderkit** — Full-stack file uploads: headless React hook, magic-number validation, retry/abort, GCS/S3 providers. Published on npm, MIT. npmjs.com/package/uploaderkit

SELECTED PROJECTS

- Café Combate** — Offline-first ERP monorepo with 13 apps: warehouse, sales, production, purchasing, e-invoicing, payments. React, Dexie, Express, PostgreSQL.
- Facturalandia** — Multi-tenant e-invoicing platform: per-organization encrypted keys, signed webhooks, in-house auth. Express, MongoDB, Redis, Stripe.
- Agates From Mexico** — E-commerce with Stripe, PayPal, RBAC, Redis and Cloudinary. Next.js, PostgreSQL.
- Metri** — Open-source fitness platform: web toolkit (17 calculators, bilingual, PWA) + offline-first mobile app. Next.js, Expo, SQLite.

SKILLS

Languages: TypeScript, JavaScript, Java, SQL, VB.NET/VBA

Frontend: React, Next.js, React Native (Expo), Tailwind CSS

Backend: Node.js, Express, ASP.NET MVC, REST APIs, WebSockets

Data: PostgreSQL, MongoDB, MySQL, SQL Server, Redis, SQLite, Drizzle ORM

Tools & Cloud: Git, CI/CD, Vitest, Vercel, Heroku, AWS S3, Google Cloud, Stripe

EDUCATION

B.Eng. in Software Development and Management — Technological University of Chihuahua — 2024 – 2026

Technical University Degree in IT, Multiplatform Software Development — Technological University of Chihuahua — 2022 – 2024

LANGUAGES

Spanish (native) · English (B2)
